

Michell Ledwaba

JUNIOR DATA ANALYST|DATA SUPPORT|EXCEL|POWER BI|SQL

SOUTH AFRICA |0797464268| michellemahlodi44@gmail.com

PROFESSIONAL SUMMARY

Detail oriented entry-level data professional with an Advanced Diploma in Crop Production and training in data analytics, with practical Work-Integrated Learning experience requiring accurate record keeping, following procedures and maintaining attention to detail. Skilled in Microsoft Excel, data organization, data cleaning and basic data analysis, with developing knowledge of Power BI and SQL databases. Ability to translate data into clear insights that support decision making. Seeking a Junior Data Analyst, Data support analyst, Reporting analyst or Data entry opportunity.

CORE SKILLS

- Data Entry & Data Administration
 - Microsoft Excel
 - Data Cleaning & Organisation
 - Data Validation & Accuracy Checking
 - Data Analysis
 - Tables and Charts
 - Power BI
 - Basic SQL
 - Documentation & Record Keeping
 - Remote work & Self management
 - Written Communication
 - Task & Deadline Tracking
 - Time Management
 - Attention to detail
-

TECHNICAL SKILLS

Data analysis

Data cleaning, data validation, exploratory data analysis, identifying trends and patterns.

Microsoft Excel

Data entry, sorting, filtering, formulas, data cleaning, categorization and basic analysis

POWER BI

Dashboard development, data visualisation, KPI reporting, power query and interactive reports.

SQL

Basic SQL queries ,database creation,tables and data retrieval.

DAX

Basic measures and calculations in Power BI

Data visualisation

Charts,KPIs,dashboards and communicating insights

Microsoft Office

Excel, Word and PowerPoint

Digital tools

Email platforms, google docs online learning platforms and digital collaboration ,Chat gpt and Claude.

PROJECTS

Agriculture Data Analysis & Power BI Dashboard Self-Directed Project | 2026

Tools: Power BI, DAX, Excel

- Cleaned and prepared an agricultural dataset for analysis and visualisation.
- Developed an interactive Power BI dashboard analysing agricultural production, yield and profitability.
- Created KPI measures including total profit, average yield and average profit margin.
- Analysed profitability across crops, provinces and irrigation types.
- Created visualisations to compare crop performance and provincial performance.
- Used a scatter plot to investigate the relationship between rainfall and crop yield.
- Presented key findings through an interactive dashboard designed to support data-driven decision-making.

Job Salary Data Analysis |Excel

WithYouWithMe Training Project| 2026

- Worked with structured datasets using Microsoft Excel.
- Organised and categorised large sets of information.
- Used sorting and filtering to locate and review specific records.
- Applied Excel formulas to calculate and analyse information.
- Checked datasets for missing, unknown and inconsistent values.
- Practised cleaning data and preparing it for analysis.
- Used data to answer questions and identify patterns and trends.

Agriculture Database |SQL

- Created a basic relational database for agricultural data.
- Developed tables to organise structured crop and agricultural information.
- Practised SQL queries for retrieving and analysing data.
- Applied fundamental SQL concepts including database creation, tables and data querying.

EDUCATION

Tshwane University Of Technology

Advanced Diploma in Crop Production 2026

Diploma in Crop Production 2025

Sethwethwa Senior Secondary School

National Senior Certificate 2020

EXPERIENCE

Work -Integrated learning - Crop Production

Tau Fresh |South Africa |

Feb 2025-Nov2025

- Maintained accuracy and followed established procedures while completing practical agricultural activities.
- Recorded and worked with information relating to crop production activities.
- Followed instructions carefully and completed assigned tasks within required timeframes.
- Worked methodically in an environment where accuracy and consistency were important.
- Monitored crop-related activities and identified issues requiring attention.
- Worked as part of a team while maintaining responsibility for assigned tasks.
- Applied attention to detail when performing activities including harvesting, transplanting, soil preparation, irrigation and pesticide application.

CERTIFICATION AND TRAINING

DATA FOUNDATIONS

WithYouWithMe

Completed

POWER BI

Alison

Completed

Additional Online Training

- Microsoft Excel
- Data Analytics
- Data Management
- Power BI
- SQL

Professional Strengths

-
- Highly attentive to detail.
 - Patient and Methodical approach to repetitive tasks.
 - Comfortable for checking work for errors.
 - Able to work independently and follow instructions .
 - Willing to ask questions when information is unclear.
 - Clear and written communication.
 - Strong interest in developing a career in data and business support.
